Computer Club - 9/2/17 - Help Sheet

Roboto | font-family: 'Roboto', sans-serif;

Pangolin | font-family: 'Pangolin', cursive;

Barrio | font-family: 'Barrio', cursive;

Link Fonts Code | <link href="https://fonts.googleapis.com/css?family=Barrio|Pangolin|Roboto" rel="stylesheet">

Link CSS Code | <link href="styles.css" rel="stylesheet" type="text/css">

Linking CSS

How to link a css3 file with html5

```
<head>
    <link href="styles.css" rel="stylesheet" type="text/css">
</head>
```

That is what it should look like

In between your head opening and closing tags [<head></head] is where you will put the css link code written above

so just copy the code into the correct place add "background-color: green;" too your css file and if the page background changes to green then it has worked and you have linked the css correctly, if this does not happen first check that you put in the css code correctly then ask me for help.
